AJEET SHARMA

Senior Data Analyst

ajeet.ajitsharma@gmail.com | +91 70620 20333 | Jaipur, Rajasthan, India

PROFESSIONAL SUMMARY

Results-driven Senior Data Analyst with 7+ years of experience delivering data solutions across financial services and logistics domains. Proven expertise in Python, SQL, Oracle Database, Power BI, and Risk Analytics — including Credit Scorecard Modeling, AML compliance systems, and Early Warning Systems. Adept at building ETL pipelines, automating reporting workflows, and translating complex datasets into actionable business intelligence that drives operational efficiency and regulatory compliance.

CORE SKILLS

Languages	Python (Pandas, NumPy, SQLAlchemy, Matplotlib, Scikit-learn) | SQL | PL/SQL
Databases	Oracle Database | MySQL | Microsoft SQL Server (SSMS) | Stored Procedures | Triggers | Views | Indexes
BI & Reporting	Power BI | Zoho Analytics | Advanced Excel | KPI Dashboards | MIS Reporting
Analytics	Credit Scorecard Modeling | WOE / IV Analysis | Logistic Regression | AML & EWS Systems | Risk Analytics | Regulatory Reporting
Data Eng.	ETL Pipelines | Data Modeling | Data Validation | Report Automation | Query Optimization | Performance Tuning
Tools & Env.	Django | Git | Jupyter Notebook | VS Code | Oracle SQL Developer | SAS (Basic) | 3PL Analytics

PROFESSIONAL EXPERIENCE

SK Finance Ltd. | *Senior Data Analyst* Mar 2023 – Present

Jaipur

- Developed and maintained **risk analytics**, compliance monitoring, and reporting solutions using **Python**, **SQL**, **Oracle Database**, and **Django**.
- Designed **Power BI** and **Zoho Analytics** dashboards for business intelligence, portfolio monitoring, and regulatory reporting used by senior leadership.
- Automated **ETL** processes, data validation, and reporting workflows — reducing manual effort and improving data quality across departments.
- Engineered and optimized **SQL queries**, stored procedures, triggers, views, and database objects to support high-performance analytical applications.
- Built and deployed **Credit Scorecard Models** (WOE/IV + Logistic Regression) and an **AML monitoring system** to mitigate credit and financial crime risk.
- Collaborated cross-functionally with Risk, Compliance, Business, and Operations teams to deliver scalable, data-driven solutions aligned with regulatory requirements.

RR Logistics | *Data Analyst — Python & SQL* Feb 2020 – Feb 2023

Jaipur

- Developed and automated **freight audit**, reporting, and analytics workflows using Python and SQL, improving billing accuracy and audit efficiency.
- Designed **KPI dashboards** in Zoho Analytics to monitor logistics performance, vendor SLAs, and operational efficiency metrics.
- Built data validation and reporting solutions to improve transportation data quality and streamline business reporting cycles.
- Analyzed logistics, vendor, and transportation datasets to identify cost-saving opportunities and support operational decision-making.

Sakar Engitech Pvt. Ltd. | *Python Developer & DBA* Feb 2019 – Jan 2020

Jaipur

- Developed and maintained **CRM applications** using Python and Oracle Database, enhancing customer data management capabilities.
- Automated operational workflows using Python, SQL, stored procedures, and triggers — reducing processing time and manual errors.
- Created **MIS reports** and Excel-based dashboards to support project monitoring and senior management reporting.
- Managed database objects, schema design, and data validation to ensure data integrity across applications.

KEY PROJECTS

- **Credit Scorecard Model**
  Developed a production-grade Credit Scorecard Model using Python, SQL, WOE/IV analysis, and Logistic Regression to assess customer credit risk and support lending decisions. Built Power BI dashboards for real-time risk segmentation and portfolio monitoring.
- **Anti-Money Laundering (AML) System**
  Designed and implemented an automated AML transaction monitoring solution using Python and Oracle SQL to detect suspicious activity and generate compliance alerts. Delivered Zoho Analytics dashboards for regulatory compliance tracking and audit reporting.
- **Early Warning System (EWS)**
  Developed a rule-based risk monitoring system to proactively identify customers showing early signs of default. Automated alert generation workflows and built dashboards for portfolio risk management and executive reporting.
- **DataMart Platform**
  Built a centralized DataMart using Django, Python, and Oracle Database to automate ETL pipelines, report generation, and multi-department data delivery — significantly reducing manual reporting overhead.
- **Logistics Performance & Freight Audit Automation**
  Engineered automated freight audit and analytics solutions using Python and SQL to process shipment, inventory, invoice, and transportation data. Built KPI dashboards to monitor logistics performance and drive cost optimization.

CERTIFICATIONS

Machine Learning Specialization — Google / Coursera May 2026

Topics: Supervised Learning, Regression, Classification, Feature Engineering, Model Evaluation, Decision Trees, Scikit-learn

EDUCATION

Bachelor of Computer Applications (BCA) 2013

University of Rajasthan, Jaipur
